

How to Make a Categorizing Chart

Use a categorizing chart to help you organize our thoughts.

- Use a square for each event or group.
- List details below the corresponding event / group box

Group / Event #1	Group / Event #2
<ul style="list-style-type: none">• Detail 1 _____• Detail 2 _____• Detail 3 _____	<hr/> <hr/> <hr/>

- If your detail has a “sub detail” use a thought bubble to connect it to the corresponding detail

- Write neatly
- All your notes must fit on one side of a sheet of paper
- Hold your paper horizontally
- Don't forget to put a title on your chart!!
