## Climates in Central America

**Directions:** Read **page 205 – 206** in your textbook (Chapter 7, Lesson 1), then create a visual representation of the three vertical climate zones in Central America using the work sheet attached. Cut and paste the words and images into the correct climate zone based on the information provided in your reading.

---

---

---

---

**Tierra caliente**

warmest zone

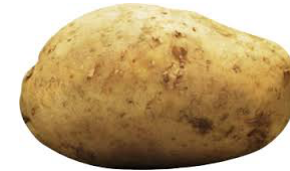

**Tierra templada**

chilly nights

**Tierra fria**

cooler temperatures

**Tierra helada**

most people live here

“temperate land”

*6,000 to 10,000 feet*

“frozen land”

*sea level to 2,500 feet*

“cold land”

*2,500 to 6,000 feet*

“hot land”

few human activities take place here
